ABOUT US

EAST TEXAS LIGHTHOUSE FOR THE BLIND

Created in 1976, ETLB has served blind and visually impaired East Texans continuously for 36 years through our mission: *“Empowering blind Americans through rehabilitation, education, training and employment”*.

It is estimated that 2% of the population of East Texas is legally blind which translates to a potential 54,000 individuals in need of services. Through our Rehabilitative Services division, blind and visually impaired individuals can learn everyday skills to improve their quality of life and to mainstream back into society and the workplace.

Our 4,600 square foot Rehabilitative Services building provides the first steps in the empowerment of the blind by offering life skills training, vocational training, and adaptive equipment necessary for upward mobility.

All that is required for these free services is a simple needs assessment with a professional counselor who is also blind, as is most of our staff. All of these professionals are great examples of persons who, in spite of their loss of eyesight, have moved to successful and fulfilling careers helping others conquer their disabilities.
